Pioneering a Whole-Systems, Unitive Approach to Cancer, Chronic Illness, and Lifelong Wellness

Mederi Center® and Mederi Care® - Beyond Integrative Medicine

Mederi Center is a nonprofit clinic, research, and educational organization for wholistic health and healing. **We are dedicated to optimizing health and wellness for people of all ages, and to improving the quality of life and outcomes for patients with chronic diseases, cancer, and stress or age-related conditions.** We work tirelessly to provide a comprehensive approach toward the transformation of healthcare for individuals and institutions.

The Mederi Care model (also known as the Eclectic Triphasic Medical System or ETMS) provides highly effective and personalized treatment plans designed to address every aspect of an individual's health by applying our founder's extensive knowledge of how plants, nutrients, diet, lifestyle, and pharmaceuticals work with the human body at the cellular, molecular, and genomic level. **By utilizing botanical and nutritional medicine independently and in concert with allopathic medicine, we have had outstanding results in thousands of cases. Our patients live better, longer lives.**

Our **research initiatives** seek to validate the efficacy of these treatments so they can be accepted by and integrated into the wider medical community. This is critical in making our approach to patient care available and affordable to all. In addition, our **patient aid program** offers support to patients in financial need who would not otherwise be able to comply with their Mederi Care regimen and monthly protocol costs.

As part of our **education initiatives, Mederi Academy®** is an online training program that teaches healthcare practitioners how to incorporate the Mederi Care model into their practice. The program provides clinicians with the skills they need to enhance patient vitality and significantly improve the quality of life and longevity for people facing cancer and other serious health challenges, thus impacting future patients at a global scale.

Your donation is critical to advance the programs and initiatives of the Mederi Center. With your support we can help more people achieve optimal health and well-being, even when battling cancer and chronic illness.

Our Unique Approach

Our whole-systems Mederi Care approach to patient care is distinctly unique among wholistic healthcare models and other natural healing or integrative centers. **We apply a clinical 'unitive' approach to healing with Mederi Care, taking integrative medicine beyond the current conventions for addressing disease and promoting health.**

Practitioners trained in Mederi Care are deeply committed to providing **the highest level of individualized care** for their patients. This involves learning everything they can about a person's total health picture and cultivating a strong partnership with them **that focuses on achieving a high quality of life and optimal well-being.**

“Donnie saw me as a person, not a patient. Every encounter included a heartfelt discussion of my physical, emotional, psychological, and spiritual well-being. He truly wants to know the complete picture. Am I happy? Am I loved? Do I sleep well? How are my relationships? Do I laugh often? Am I physically fit? These are just a few of the questions he asks and then really listens. He encourages me to continue to live vibrantly. Any time I have a concern he is accessible and helpful. After four years I continue to thrive under Donnie’s care.”

~ Diane Butera

Our practitioners have mastery in **the art and science of complementary, integrative, and wholistic medicine.** They prescribe comprehensive protocols that successfully address the many underlying factors involved in overcoming disease and restoring optimal health.

While symptom management is an important aspect of patient care, **the positive clinical outcomes we achieve are a result of addressing the whole picture and modifying our protocols in response to patient progress over time.** Our patient assessment strategy includes an in-depth look at a person's constitution and energetic make-up, custom bloodwork, and specific biomarkers that help us evaluate genomic alterations, risk factors, or disease states. Customized Mederi Care protocols consist of targeted, therapeutic, natural medicines that address a wide range of conditions.

Mederi Center's onsite herbal compounding apothecary sources hundreds of botanicals of superior quality, providing the raw materials needed to expertly formulate medicines for each patient that yield superior results. These apothecary services and carefully curated products are available to practitioners and their patients worldwide.

Mederi Center's Pioneering Programs

Patient Care

Mederi Care practitioners at our Ashland, Oregon clinic provide in-person or remote consults for patients worldwide. **Our practitioners are fluent with both conventional, standard-of-care treatments as well as evidence-based botanical and nutritional medicine.** They work in partnership with the patient and their oncological team or healthcare provider, respecting and supporting all approaches, with the primary goal of helping them complete their prescribed treatment regimen for optimal results.

Mederi Center Clinic in Ashland, Oregon

How we help our patients:

- We act as a patient advocate to provide support in navigating the overwhelming landscape of facing a severe or life-threatening diagnosis like cancer
- We apply the most recent advances in technology, science, and healthcare to optimize results and provide relief and healing from treatment-related issues
- We prescribe individually tailored botanical, nutritional, dietary, and lifestyle protocols
- We monitor patient progress and adjust treatment strategies as an individual's condition responds to treatment or changes

"Knowing that the Mederi protocol would be both chemo-enhancing – making the treatment as effective as possible, and chemo-protective – protecting healthy cells, helped to make it possible for me to proceed with the treatment. Dr. Susan's advice and guidance throughout the treatment period was absolutely crucial."

~ Anonymous

Education for Healthcare Providers

- We provide **training in Mederi Care methodology** for medical doctors, oncologists, naturopaths, acupuncturists and other healthcare professionals through in-person and virtual lectures and presentations
- We offer **multi-day live programs** that train healthcare practitioners to successfully apply in-depth assessment techniques and therapeutic strategies to manage cancer and other conditions using Mederi Care

“When I first met Donnie Yance in 1999, I was impressed with the depth and breadth of his knowledge of laboratory medicine, oncologic pathology, and molecular oncology, as well as his expertise in nutrition and botanical medicine. Despite his lack of formal training in medicine, Donnie knows more about molecular oncology than any oncologist I know, with perhaps the exception of myself.”

~ Dwight L. McKee, MD, CNS, ABIHM

- We provide on-demand courses, as well as live engagement with esteemed faculty, which enables practitioners around the world to study Mederi Care through **Mederi Academy, our online learning program**
- We conduct quarterly **Round Table Discussion Group** sessions for alumni of our educational programs to provide continuing education in Mederi Care/ETMS. Practitioners present cases for in-depth review and discussion with Mederi faculty.
- We maintain **an online forum called ETMS Network** where members regularly receive numerous research articles and papers and connect with other colleagues in the core ETMS practitioner community.

Educational Programs with Donnie Yance and Esteemed Faculty

Research Initiatives

- **We document and publish case studies and coordinate clinical research trials** with major medical institutions combining Mederi Care therapies with conventional medicine. These programs serve to validate the safety and effectiveness of using botanical and nutritional medicine in combination with standard-of-care treatment for improving the quality of life of people with cancer.
- **We serve as a trusted source for the latest research**, clinical trials, and relevant news and information from around the world for our colleagues

Why We Need Your Help

With your help we can improve how cancer and chronic illness are treated, produce better medical outcomes for patients, and change the current healthcare paradigm.

Cancer: A Revolutionary Approach is Desperately Needed

A cancer diagnosis can be frightening, and the reality is that there is no simple answer. The word “cancer” is applied to what are hundreds, perhaps even thousands of different diseases - all characterized by uncontrolled cell growth, which over time often mutates into newer, more aggressive forms of the disease. It is estimated that in the coming year close to 2 million people will be diagnosed with cancer and over half a million people will die from it. A new, innovative approach to treatment is needed now.

Over the past 40 years, traditional medicine has made steady, yet slow advances in treating cancer. **However...**

- New breakthrough drugs are only extending lives by two to three months
- Mortality rates in Stage IV cancer have not improved
- Survivors suffer debilitating symptoms from the illness itself or from the toxic treatments they undergo to fight the disease
- Standard course of treatment for most cancer still consists of surgery, chemotherapy, and radiation – just as it did forty years ago

The “C” Word

“Immediately I knew something was wrong. As I was getting the sonogram on my breasts, the woman’s hand started shaking and I saw her counting. That’s when I knew it was bad. When I met with the oncologist she said, ‘Something’s lit up on your spine... which means you’re stage four.’ There was no hope prescribed. It was just... ‘this is the path you’re going to take until you die.’ It was really hard to find other people that lived past a year or two, but I found them and then I said, I’m going to become one of them.”

The Promise of Mederi Care

Hope for Healing

Mederi is playing a huge part in the fact that I’m able to continue to thrive and live with the cancer. Mederi is healing... healing in every aspect with your body, your mind, your soul. Not only are they able to talk about all of the medicine that I’m on and the chemo and oncology aspect, they’re also giving me the supplements to keep my body healthy.

- Keri Stromski ”

The fundamental objective of the Mederi Care approach is to strengthen the individual in a harmonious way and to lessen the vulnerability to or the effects of degenerative disease. In contrast to conventional medicine, where cancer is treated very generally, Mederi Care is a highly personalized, unitive, in-depth clinical approach to a person’s illness as it manifests uniquely in them.

Employing this approach, Mederi Care has repeatedly had outstanding and unparalleled patient outcomes, applied singularly and in tandem with conventional cancer treatments. Our patients experience enhanced vitality and a greater potential for survival.

Your Help is Needed to Expand the Reach of Mederi Care

When you help fund our research and global educational initiative, you are facilitating the spread of Mederi Care around the world so more healthcare providers can apply Mederi Care with their patients. Mederi Care trained professionals acquire a level of expertise in diagnostics, assessment, and therapeutic tools, which empowers them to return to their respective communities and achieve substantially better outcomes with the patients they serve.

The Future Is in Your Hands

To help achieve our vision of advancing personalized, integrative medicine and cancer care to the next level, the **Mederi Future Fund Campaign goal is to raise \$3,000,000**. These funds will enable us to address and expand the following important programs:

1. Patient Aid Fund

GOAL: Grow Financial Capacity to Assist More Patients

Through the generous support of donors, Mederi provides financial assistance to patients that need help covering the cost of their personalized Mederi Care treatment plan protocols. Our vision is to grow the Patient Aid Fund to offer a minimum of 5% of our patients with some level of protocol assistance. We understand the challenges of healthcare costs and seek to help when possible. Recipients are identified by practitioners and undergo an application process.

2. Mederi Academy: Online Training Program

GOAL: Train More Healthcare Providers, Impact More Patients

Having launched in 2022, Mederi Academy trains healthcare practitioners around the world who are committed to providing comprehensive care in the field of integrative, unitive medicine, with a particular focus on the Mederi Care methodology. Training in the Mederi Care model emphasizes advanced clinical applications of botanical, nutritional and biological medicine principles in order to successfully execute health-building protocols that enhance patient vitality and lifespan in the treatment of many health conditions, including cancer.

Our goal is to expand our curriculum to produce and offer more in-depth modular courses through our online learning platform. In order to promote our program broadly, we need funding to support an aggressive marketing strategy that will reach healthcare providers worldwide, thus impacting future patients at a global scale.

3. Clinical Trials & Case Study Research

GOAL: Validate Efficacy of Mederi Care

Research for developing case studies and formal clinical trials must continue in order to demonstrate that Mederi Care as a primary integrative approach is superior to other current methods and practices. Ongoing research and clinical trials will help substantiate the validity of botanical medicine and nutrition as foundational therapies along with their successful use in combination with other specific targeted therapies.

Help Us Change the Way the World Views and Delivers Medicine

Though our successes to date have been significant, we still have a long way to go. We need help from passionate and visionary supporters who understand that Mederi Care offers patients the best hope for enhanced quality of life, positive outcomes, and a better chance of survival. Please partner with us in advancing our research-informed, personalized, integrative approach to patient care.

Please donate to the Mederi Future Fund today - and make change possible tomorrow.

With your help, vision, caring, generosity, and partnership, we can:

- Educate and train more healthcare providers in Mederi Care
- Expand our reach to bring Mederi Care to more patients
- Save more lives and improve quality of life for people with chronic illness
- Offer Patient Aid funds to those in need of support
- Conduct clinical trials and research to validate our method
- Document and share results to establish credibility in mainstream medicine
- Change the narrative around cancer from fear to hope
- Evolve the existing paradigm of conventional healthcare

**By becoming a donor, you are taking part in
changing the future of medicine
and we thank you.**

Together, we CAN heal.
